

# JULIEN RECOMMENDED UNDERMOUNT FITTING TEMPLATE

MODEL #3515

ALL INSTALLATIONS SHOULD BE PERFORMED BY TRAINED AND EXPERIENCED INSTALLERS.  
Use this template in conjunction with the instruction guide.  
Undermount sink units should be installed in a solid surface countertop only (granite or solid surface or food surface);  
not recommended for laminate form surfaces.  
The specification of the fixing part will change according to the form surface material: granite, marble, stone  
or butcher-block countertop. Please contact your countertop fabricator for specific details.  
Dimensions of hole may vary by 1/32" therefore it is a good practice to test the fit of  
the product on a waste section of material prior to the final cut out being fabricated. Use this template as a guide only.
